## Electricity, gas & water: Cost & activity forecasts 2017

A report on the outlook for costs and new construction activity  
in Australia's electricity, gas and water sectors

macromonitor

# Electricity, gas & water: Cost & activity forecasts 2017

What is the long term outlook for costs in Australia's electricity, gas and water sectors?

How strong will wage increases be?

What cost escalation factors should be used in each sector?

What is the outlook for materials costs, fuel and plant hire costs?

What is the outlook for new construction activity in each part of the electricity, gas & water sector, in each state, and how will this affect the rate of costs escalation?

*Electricity, gas & water: Cost and activity forecasts 2017*, is the leading data and forecasting service for Australia's utilities industry.

The report contains comprehensive, detailed information not available elsewhere. It is an essential resource for all businesses operating in the utilities sector in Australia.

This information is valuable for:

- Internal analyses and projections of costs
- Use as supporting information for regulatory submissions
- All types of business planning and forecasting

## Subscriber assistance

Macromonitor analysts are available to help subscribers make full sense of the information in this report.

## Report coverage
