Australian construction outlook

Forecasting service

A comprehensive service covering all segments of building
and construction activity in Australia looking head ten years

macromonitor

Australian construction outlook

Forecasting service

What is the outlook for Australia's construction industry?

How does the outlook for each type of construction differ?

What will be the main drivers of activity over the coming months and years?

Australian construction outlook is the leading data and forecasting service for Australia's construction sector.

The service provides updated forecasting reports throughout the year on each sub-sector of building and construction in Australia.

It provides subscribers both with detailed information where required as well as concise summary information. Users can tailor their subscription to cover specific market sectors.

Our reports result from high quality, in-depth research and analyses, across all segments of construction activity.

Features of the report include:

- **Detailed modeling** of supply, demand and vacancy/occupancy for specific sectors
- **More detailed breakdowns**, in many areas, than the standard ABS data
- **All sectors covered on a consistent basis**, in value of work done terms, and also in commencement terms for building sectors
- **Each state and territory** is covered in detail

Sector reports

The forecasting service is comprised of the following sector reports:

- **Residential building** (including houses, medium & high density and renovations)
- **Non-residential building** (by type of building)
- **Transport infrastructure** (including roads by type, bridges, rail and ports)
- **Utilities** (electricity, water & wastewater, gas and telecommunications)
- **Resources**
- **Overview** (concise summary of all construction sectors in Australia and each state)

These reports are each fully updated and published twice per year.

The reports can be purchased individually if required (see order form at right).

Each of these reports include the following:

- Data, forecasts and commentary for each state and territory
- Historical data and ten years of annual forecasts
- Detailed breakdowns by type of construction within each sector
- Analysis and projections of supply and demand within each construction segment

Report format

Subscribers receive the reports in both soft and hard copy (soft copy includes PDF, Excel Spreadsheets and Powerpoint Charts).

Subscriber assistance

Macromonitor analysts are available to help subscribers make full use of the information in the reports.
